RESEARCH

Interests	Coastal ecology · fisheries management · climate change adaptation
Areas	Ecology · Global and Planetary Change · Management, Monitoring, Policy and Law · Earth-Surface Processes · Sociology and Political Science · Ecology, Evolution, Behavior and Systematics

RESEARCH SUMMARY

103	1,786	27	46	2.39	33%
Publications	Citations	h-index	i10-index	Field-weighted impact	World top 10%

Counted from the 103 publications listed below, 2005–2026. Field-weighted impact is the mean over the 73 works scored for it; 1.00 is the world average for works of the same field, type and year. 24 of the 73 papers scored for it are among the world's most cited tenth for their field, type and year.
